# BLK2GO Backpack

This Backpack is designed to be used with BLK2GO laser scanner comfortably on the operator's shoulders, thus leaving the hands free.

The support **(4)** is made of aluminum tubes, the inclination can be adjusted by the operator allowing to keep the scanner at different heights,

- (1) the BLK2GO Adapter is equipped with 5/8 converter
- (2) Standard Leica pin with locking knob allows 360 ° rotation to orient the scanner in any direction.

## COMPONENTS

1. BLK2GO Adapter
2. Standard Leica pin 5/8 "
3. Base for initialization
4. Adjustable support

Weight (without BLK2GO) 2 Kg

# BLK2GO Backpack

Base for initialization

Correct position of the adjustable support

**ATTENTION:** the locking strap must be positioned above the knob and tightened very well

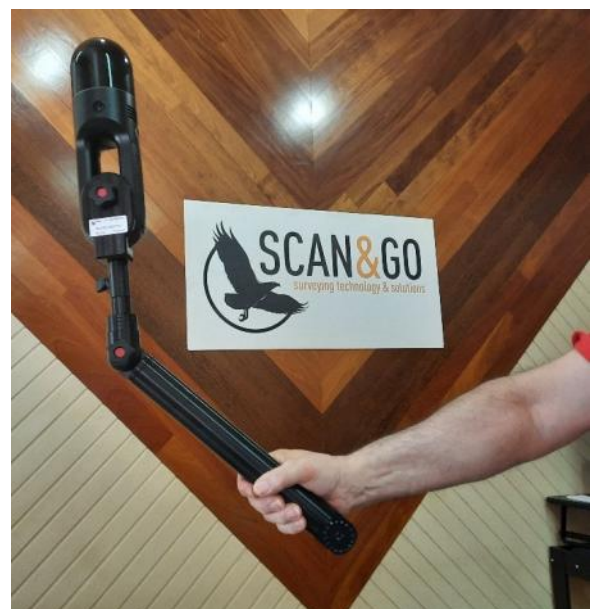

# BLK2GO Backpack

Install the upper part of the support by using the supplied knobs.  
Adjust the inclination of the tube and the support

The use of the above part of the support for scanning without the Backpack

# BLK2GO Backpack

- (3) Place the scanner with BLK2GO adapter and standard Leica pin on the base for initialization of the scanner.  
Fix the scanner on the support and start walking when scanning

Thanks to the quick release the scanner can be easily used by hand in all situations when the Backpack would be bulky or not suitable
